Solar Street Light

Operating Manual

Product Overview :

Solar light is an electric lamp which converts light energy into electricity by solar panels during daytime and turns on automatically at night. The advantage of the product is no wiring, easy for installation and without city electricity consumption..

This light uses durable components including Solar Panel, Lithium Phosphate battery, LED Lamp & Microcontroller based solar charge controller with PIR motion sensor.

Section 2

Application:

Widely applied in courtyard, residential area, rural road lighting.

Installation Guide:

Rated Power : LED 200W/300W
Lighting Mode : Time Control / Photocell Control
IP rating: IP65

Tips:

1. Installation direction of the solar panel is 5-10 degrees south to west, an angle of 35 degrees with the horizontal place
2. Please install the solar panel in the sun direction to avoid affecting the power generation efficiency.
3. Please ensure the installation is stable.
